

Installation Process

The installation process for XMPlayer Express 2014 is shown in six sequential screenshots:

- Welcome to the XMPlayer Express 2014 Setup Wizard:** This screen provides an overview of the installation. It states that version 3.0 will be installed and recommends closing other applications. The 'Next >' button is highlighted.
- Select Destination Location:** The user is asked where to install the program. The default path is 'C:\Program Files (x86)\XMPlayer Express 2014'. A 'Browse...' button is available. A note indicates that at least 37.2 MB of free disk space is required.
- Select Start Menu Folder:** The user chooses where to place shortcuts. The default is 'XMPlayer Express 2014'. A 'Browse...' button is available.
- Select Additional Tasks:** The user selects optional tasks. The 'Create a desktop icon' checkbox is checked.
- Ready to Install:** A summary screen showing the chosen destination location, start menu folder, and additional tasks. The 'Install' button is highlighted.
- Completing the XMPlayer Express 2014 Setup Wizard:** The final screen indicating that installation is complete. The 'Launch XMPlayer Express 2014' checkbox is checked, and the 'Finish' button is highlighted.

CREATING A NEW PROJECT

After you run the program, click on "Project" icon on top left corner of the screen.

Before you create the new project, be sure to put proper screen size on width and height (Pixels). You can also put the name of the project, it's optional.

When finished click on

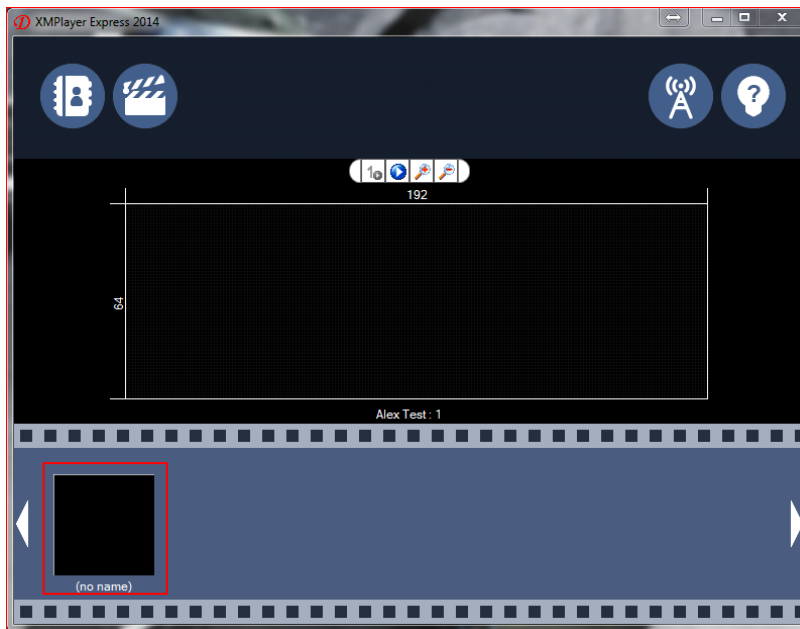

Create

Creating a Slide

1. You will only have 1 slide opened when you create a new project.

2. To display all the options Click on the slide on the bottom left corner.

Where's the Save button???
Don't worry XMPloyer Express saves
all your hard work automatically.

Adding Text

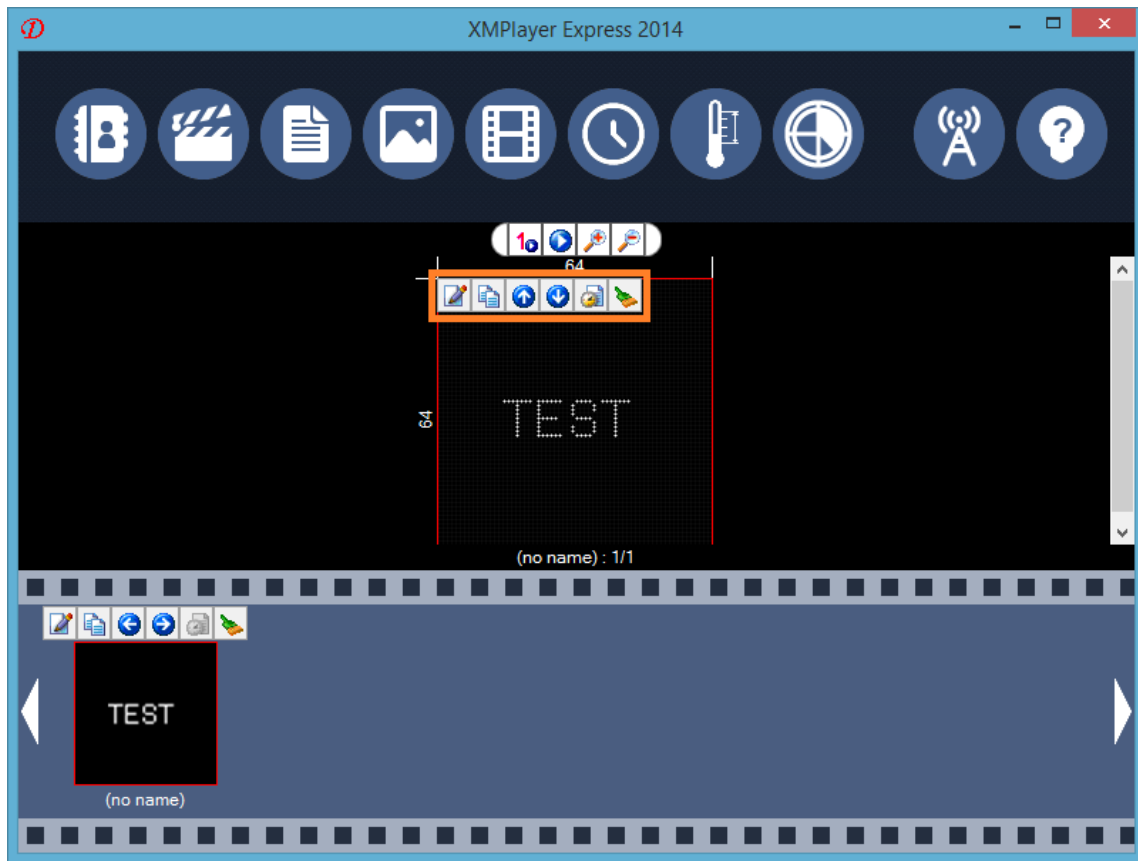

To input a text message click on the text circle. When the new window open's up it will look like the picture shown below.

Effects

Note: When the text message is insert it will not have any effect that is the default setting of XMPlayer Express.

Preview window for every effect is displayed.

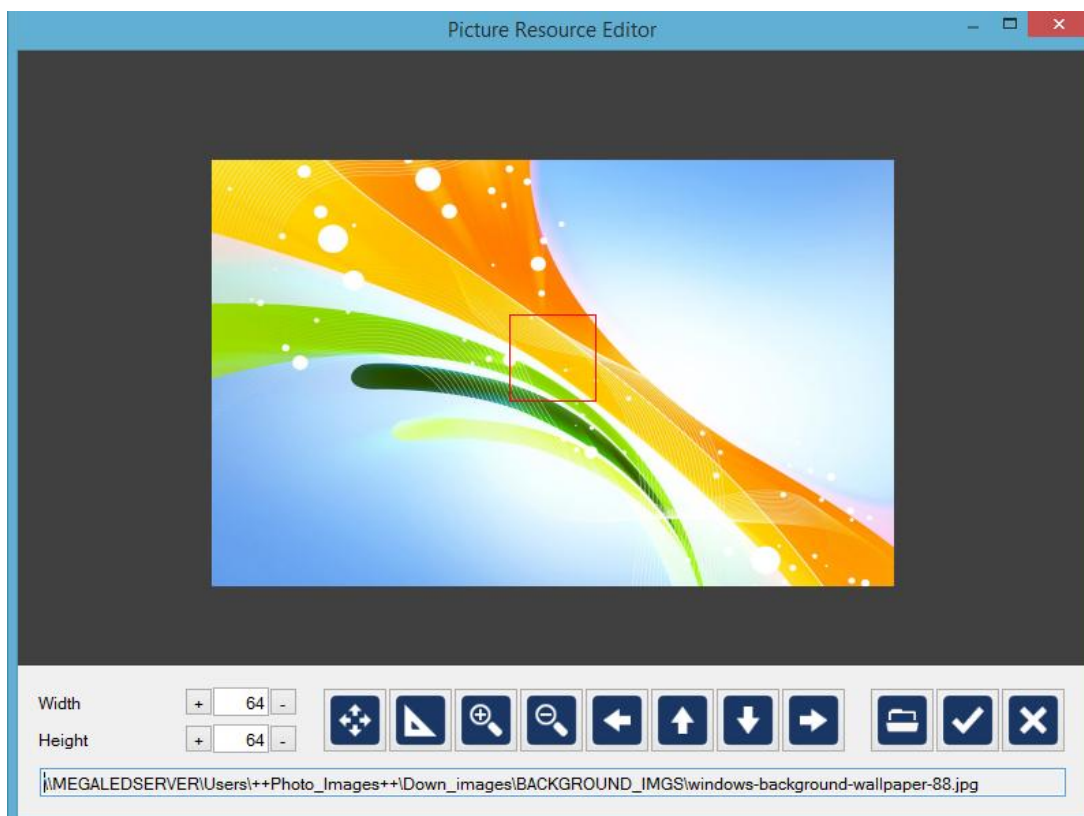

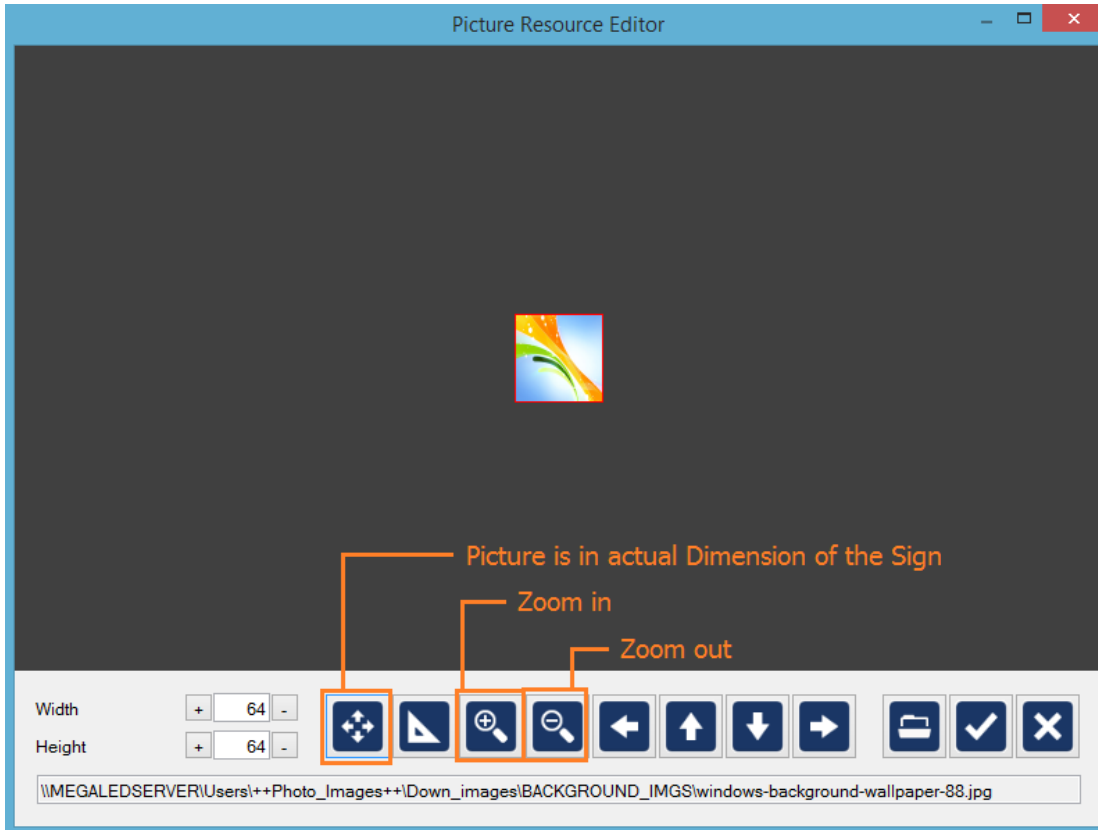

PICTURE

When you click on “Picture” tab, it will lead you to Picture Resource Editor Page.

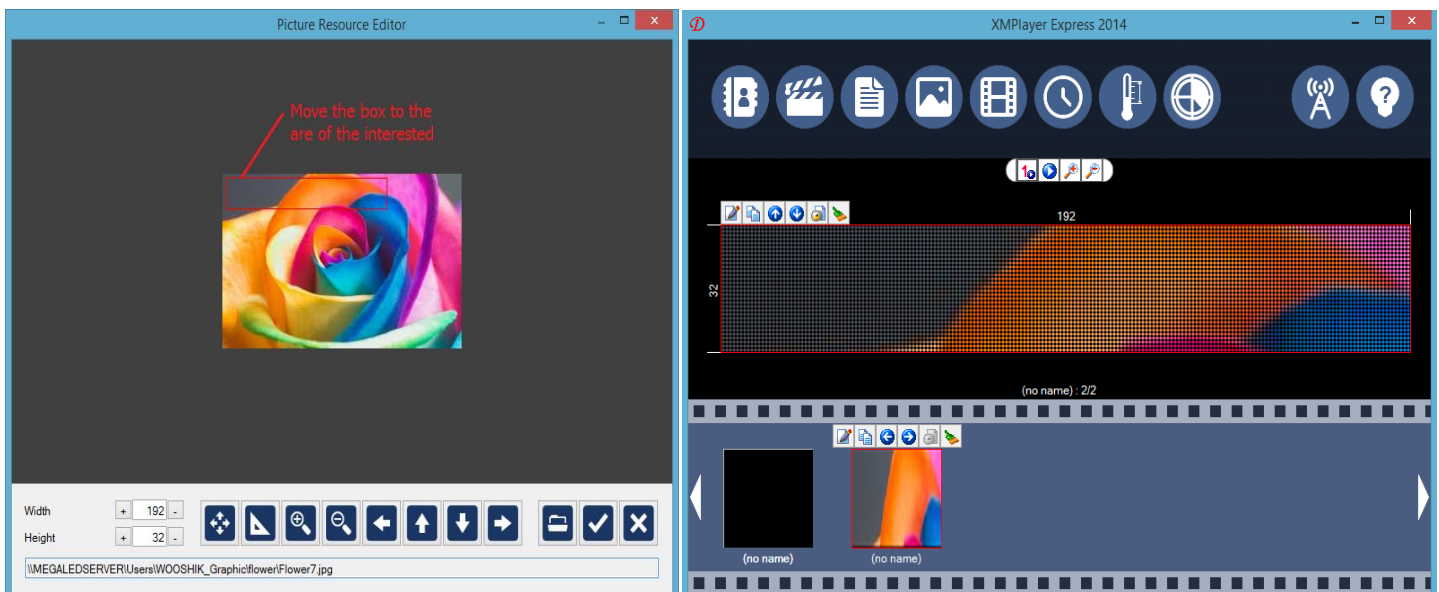

Original size of the picture

When you put a picture that is larger than actual pixel size, click “size to fit” button to shrink it to the actual pixel size.

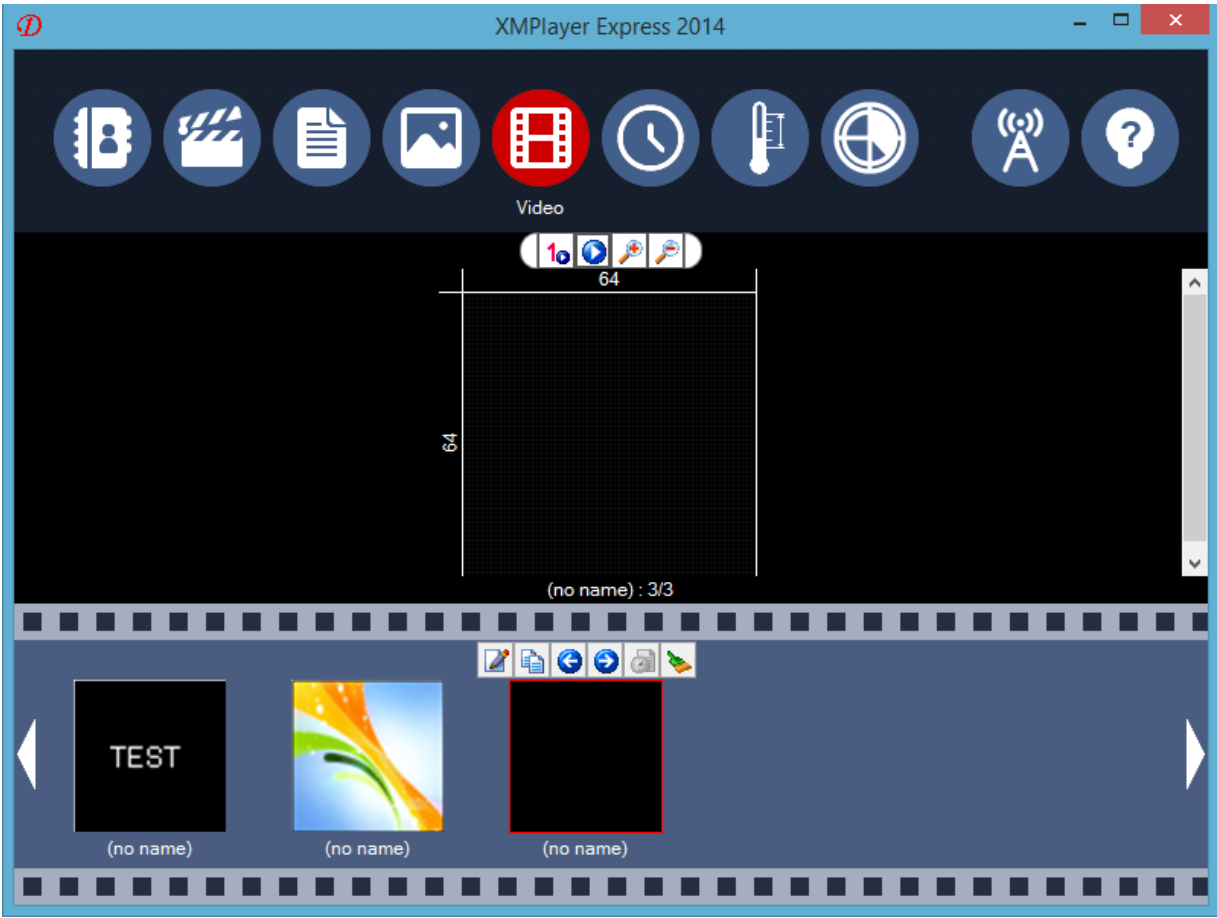

If you want to show partial part of the picture, you can move red box to area of the interested.

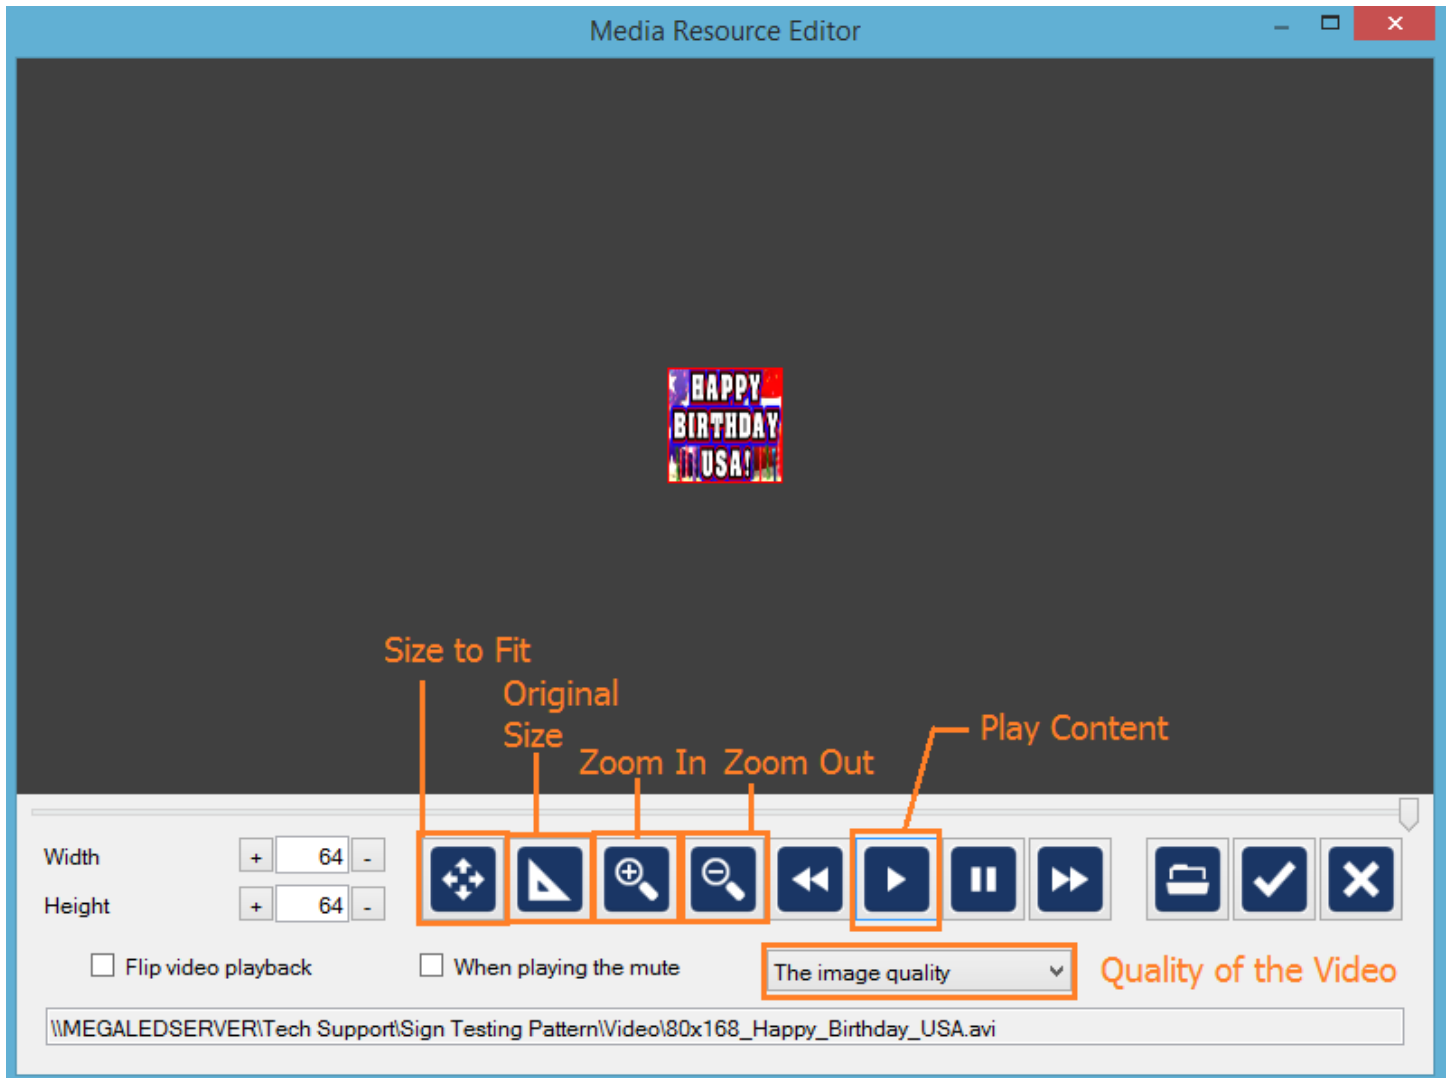

Video

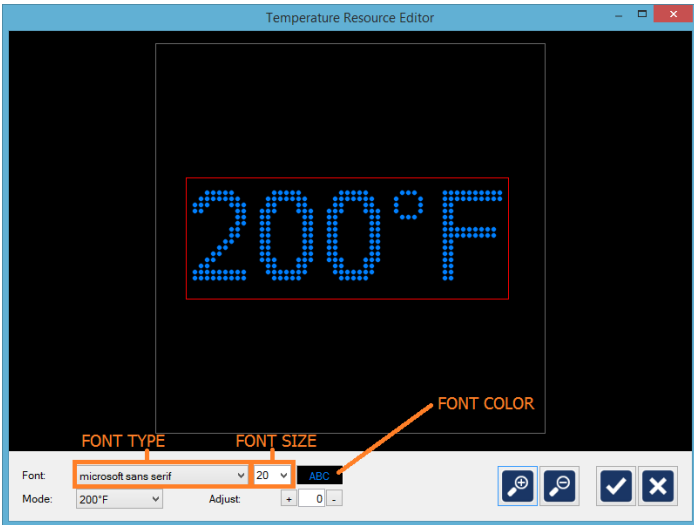

When you click on the “Video” tab, it will lead you to Media Resource Editor Page.

In this Media Resource Editor, you can add multimedia files such as (avi, mp4, swf, wmv, mov). You can adjust the size of the content to actual pixel size of the sign by clicking "Size to fit" button.

Temperature

Temperature: It displays temperature around the sign. Temperature sensor is really sensitive, we recommend you to put the temperature sensor into the area where it is not exposed under the direct sun light to have proper temperature displayed.

Click on:

To Add Temperature

Sending contents

Once you click on Find the software will look for you sign using your Wireless USB Adapter

Once it finds it there will be an IP Address displaying

A message will display saying one device found

Click on the Check Box and SEND

Your Sign should be displaying the MESSAGE you just send to it
