Custom configurations

Landscape, square or portrait.
Built in 12.6-inch increments.

Single display, double-sided pair or
linked displays. Choose the setup
your site needs.

Arrives assembled. Ready for your installer.

Pre-tested, with built-in mounting angles for attachment to a properly designed support.
Use your preferred installer. Engineering and sealed drawings are available.

— INDUSTRIAL SERIES

Built-in angles. Straightforward mounting.

Factory-installed aluminum angles run along the top and bottom.
Your installer bolts them to a properly designed support structure.

Wall and monument mounting

Use both mounting angles

The top and bottom factory angles stay attached to the cabinet and connect it to the support.

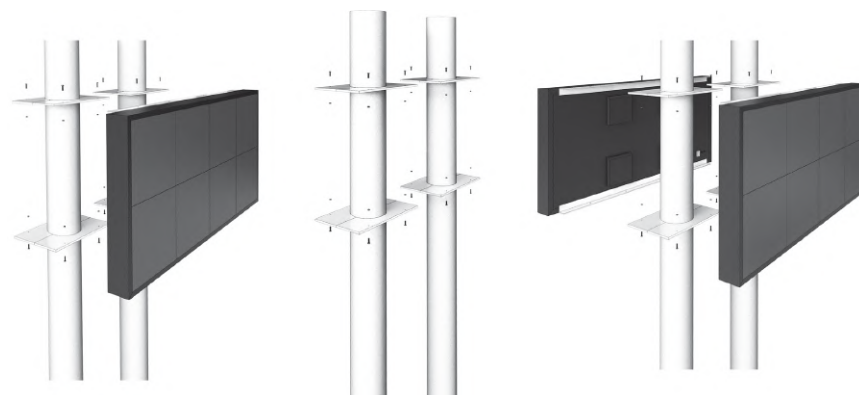

For walls and monuments

Mount to building walls or brick and concrete monument faces with supports and anchors matched to the structure.

Protect the cabinet

Do not drill or weld the cabinet, or weld the factory mounting angles to the support.

Pole mounting

Simple bolt-on installation

Bolt the sign's built-in angles to C-channel, angle iron, steel tubing or 4x4 supports to suit your installation.

Leave room for airflow

Keep rear vents clear. Confirm ventilation spacing for your model and enclosure.

Overview only. Follow current model-specific instructions and engineered project drawings.
