This manual is for reference only and does not provide any form of guarantee. The trademarks and names mentioned in this manual belong to the company. This manual may be subject to modification or change without prior notice.

I. **Product Overview**

Ultra-Bright HD Displays are more than 10x brighter than TVs and 7x brighter than most other commercial grade digital signage. The 49" 1080p HD LG screen will project vivid, bright images in direct sunlight so you can attract more customers to your business.

Harness the full computing power of the Android operating system running on a quad-core Rockchip processor. Access Google Playstore apps to download your choice of media players, content management systems, Internet browsers, and other applications.

Our Ultra Bright HD Displays have built-in Wi-Fi, Speakers, HDMI and USB ports. Connect a USB thumb drive to quickly display stored media content. Expand storage using the built-in SD card reader. You can even manage your Ultra Bright HD Display using a separate desktop or laptop computer.

II. Parts List

The Ultra Bright HD Display is divided into five primary parts.

UBHD Display: Screen

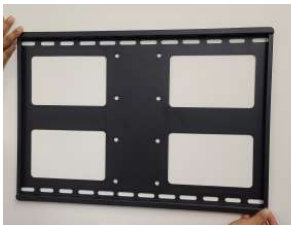

UBHD Display: Stand

UBHD Display: Base Plate

UBHD Display: Mount

UBHD Display:
Base Plate Cover
